- (10) It has been established with respect to one or more representative uses of at least one plant protection product containing silthiofam that the approval criteria provided for in Article 4 of Regulation (EC) No 1107/2009 are satisfied. It is therefore appropriate to renew the approval of silthiofam.
- (11) The risk assessment for the renewal of the approval of silthiofam is based on a limited number of representative uses, which however do not restrict the uses for which plant protection products containing silthiofam may be authorised. It is therefore appropriate to remove the restriction for use only as a herbicide.
- (12) In accordance with Article 14(1) of Regulation (EC) No 1107/2009 in conjunction with Article 6 thereof and in the light of current scientific and technical knowledge, it is, however, necessary to include certain conditions and restrictions. It is, in particular, appropriate to require further confirmatory information.
- (13) The Annex to Implementing Regulation (EU) No 540/2011 should therefore be amended accordingly.
- (14) Commission Implementing Regulation (EU) 2017/1511 (¹) extended the approval period of silthiofam to 31 October 2018 in order to allow the renewal process to be completed before the expiry of the approval of that substance. However, given that a decision on renewal has been taken ahead of that extended expiry date, this Regulation should apply from 1 July 2018.
- (15) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,
