INTERNATIONAL MAXIMUM RESIDUE LIMIT (MRL) SETTING

Dr Monika Eder
Senior Manager
Regulatory Science –
Residues, Consumer
Risk Assessment

Our focus

In today's world, food is no longer produced only for local markets but also for the large growing global market. It is essential to set internationally recognised and accepted maximum residue limits (Codex MRLs) in order to reduce trade barriers and enable worldwide trade of safe food. The setting of EU import tolerances allows internationally produced and traded food to enter the European market, even if the compound does not yet have EU approval.

Our team of professionals draw on their hands-on experience to offer you a full range of services to obtain Codex MRL or EU import tolerances. Following a detailed examination of your database, we work out individual solutions tailored to your needs. SCC provides you with full scale services including contracting and monitoring of all studies necessary in terms of analytics, toxicology and residues. We are your reliable partner for preparing dossiers and performing state-of-the-art risk assessments. Over the years, we have been successful in dossier submission and defence of compounds.

Our services

Codex MRL

- **Detailed analysis** of databases and resulting data gap analysis
- **Risk assessments** based on state-of-the-art models
- Compilation of **regulatory documents** and **dossier preparation**
- **Communication** and **data management**
- **Dossier submission** and follow-up

EU Import Tolerance

- **Detailed analysis** of databases and resulting data gap analysis
- Planning and monitoring of **studies** (analytics, toxicology, residues)
- Preparation of **pre-submission meetings**
- Compilation of **regulatory documents** and **dossier preparation**
- **Risk assessments** based on state-of-the-art models
- **Communication** and **data management**
- **Dossier submission** and follow-up

Our expertise

Our outstanding long-term knowledge of EU registration processes and all associated data requirements allows us to successfully handle all kinds of MRL applications. These include MRL applications for crops traded within the EU; MRL application for imported products to meet the level of international trade, such as import tolerance applications, and setting worldwide MRLs, eg. Codex Alimentarius MRLs.

SCC is a recognised partner for industry in the EU, USA and Asia, with contacts in the competent authorities for the EU and Codex MRL setting. We have successfully submitted and defended numerous dossiers.

Our customers benefit from high-quality regulatory and scientific expertise which we offer in all disciplines relevant for MRL setting (analytics, toxicology, residues).

Who we are

SCC – Scientific Consulting Company – was founded in 1989 by Dr Friedbert Pistel. Since then, we have risen to become one of Europe's largest privately owned and independent scientific consulting companies, supporting global customers in the regulatory affairs business.

Our headquarters are located in Germany in the culturally rich Rhein-Nahe region, less than one hour's drive from Frankfurt Airport.

Our other offices in Berlin, established in 2014, and in Tokyo, opened in 2007, complement our headquarters in Bad Kreuznach and guarantee our international customers broader access to our services.

At SCC, you will find an open-minded, innovative entrepreneurial spirit backed by the expertise and commitment of a strong team. This winning combination has played a significant role in the rapid development of the company. It embodies values such as high quality, flexibility, reliability and versatility, coupled with vast knowledge and a wealth of experience. And that is what drives us forward.
